

Safety & Warnings:

Risk of fire and electrical shock. Fixture must be installed by a qualified electrician only in accordance with national local building and electrical codes. Disconnect power at electrical panel before servicing. ⚠️

General contractor is responsible for the installation of appropriate anchors to support the load of the fixture at positions detailed in the installation manual. Installation of such anchors or other support systems must be completed in accordance with applicable building/installation code.

1. Slide extrusions together via connecting bracket (Fig. A).
Align bracket hole and extrusion hole.

2. Fasten second connector bracket screw to secure both extrusions to the connecting bracket (Fig. B).
Adjust height and level luminaire.

3. Pull cable down slightly (pushing extrusions upward) to prevent sagging or splitting in the middle (Fig. C).
Cut any excess cable.

4. If necessary after adjustment, apply silicone along the parting line between extrusions (Fig. D).
